About me

Passionate and adaptable Software Developer dedicated to ongoing personal and professional growth. I thrive on learning, bring a determined work ethic, and excel in collaborative environments. With a solid foundation in web, mobile and backend development, contributing my experience and staying at the forefront in the field of software development are my goals.

Technical Skills

- **Frontend Development:** React, Next.js, JavaScript ES6, TypeScript, RESTful API, jQuery, HTML5, CSS.
- **Mobile Development:** Android (Kotlin) and React Native.
- **Backend Development:** .Net (C#), Python (Django), MySQL.
- **GIT:** Bitbucket, GitHub.
- **Cloud Services:** AWS.
- **Languages:** English (B2)

Professional Experience

Symbiotic | Software Developer | June 2022 – Present

- Build and maintain various web applications using React JS, ensuring efficient and user-friendly interfaces.
- Develop and maintain Python-based APIs using Django and .NET with C#, for handling data communication, with a strong emphasis on CRUD operations.
- Create Android and React Native applications with Material design, Expo, and other frameworks to deliver high-quality mobile experiences.
- Expand AWS proficiency with Route 53, S3 for domain management and EC2 for scalable web hosting, optimizing website performance.
- Collaborate with cross-functional teams using tools like Postman, Android Studio, MySQL, Confluence, Jira, Visual Studio, GitHub, and Source Tree to streamline development processes.

Education Background

- **Bachelor Computer Engineer** (Tecnológico de Costa Rica, completed in 2023).
- **Udemy courses** (React Certificate, AWS Certified Cloud Practitioner course).

Soft Skills

Teamwork | Adaptability | Communication | Responsibility | Multi-tasking.

Achievements

Develop projects that have been stalled for more than 3 years and optimize old projects in production for Symbiotic in 2022.
