About me

Passionate and adaptable Software Developer dedicated to continuous personal, professional growth and aiming to elevate your company's software solutions and strategic initiatives. I thrive on learning, bring a determined work ethic, and excel in collaborative environments. With a solid foundation in web, mobile and backend development, contributing my experience and staying at the forefront in the field of software development are my goals.

Technical Skills

- **Frontend Development:** React, JavaScript, TypeScript, RESTful API, HTML5, CSS.
- **Mobile Development:** Android (Kotlin) and React Native.
- **Backend Development:** .Net (C#), Java, Python and SQL.
- **GIT**: Bitbucket, GitHub.
- **Cloud Services:** AWS.
- **Languages:** English (B2)

Professional Experience

Symbiotic | Software Developer | June 2022 – Present

- Build and maintain various web applications using React JS with TypeScript or JavaScript, ensuring efficient, responsive design and user-friendly interfaces.
- Develop and maintain APIs using .NET with C#, for handling data communication, with a strong emphasis on CRUD operations with SQL systems.
- Create Android and React Native applications with Material design, Expo, and other frameworks to deliver high-quality mobile experiences.
- Develop Unit and Integration tests with Jest, Test Library and API testing (Postman).
- Use of AWS services such as Lambda, S3, EC2 and IAM.
- Collaborate with cross-functional teams under Scrum methodology using tools like Slack, PowerShell, Confluence, Jira, GitHub, and SourceTree to streamline development processes.

Education Background

- **Bachelor Computer Engineering** (Tecnológico de Costa Rica, completed in 2023).

Certifications

- AWS Cloud Practitioner (Amazon in 2024)
- React course (Udemy academic in 2022)
- Soft Skills (Tecnologico de Costa Rica in 2023)

Achievements

Develop projects that have been stalled for more than 3 years and optimize old projects in production for Symbiotic in 2022.
